

MASKING FILM

QUICK MASK® UV

Technical Specifications

Description	Masking Film with union of masking tape UV for exterior use.
Material	Polythene plastic H.D. (High density)
Colour	Natural transparent
Treatment	Corona (paint absorbent) and electrostatic on both sides.

Use

Proper surface protection during paint jobs, specially for exterior use. Film clings perfectly to masked surface thanks to electrostatic treatment and hold paint claps avoiding drip

TECHNICAL DATA

FEATURES	UNIT	VALUE
Thickness	Microns	8-9
Approx. width	Centimetres	20,35,60,100,120,180,260
standard Lenght	Metres	25
Fold	Folded twice or four times (1.8-2.6)	
Resistance	°C	120
Tube core	Recyclable paper	
Adhesive Tape	Crepe tape UV for exterior use up to 120°C.	

Packaging

Film rolls in plastic bags to protect film and tape from external agents. Recyclable cartonboard boxes.
